

REMOTE AUTO-FLUSH CONTROLLER

For LMI metering pump installations requiring clearwater flushing

Versatile

Allows any manually or externally controlled LMI pump to be converted for automatic flushing of the liquid end. Ideal for slurry feeds and other applications.

Dual Cleaning Action

Connects to the primer-flush kit of your LMI pump and automatically flushes the suction line, pump head and discharge line.

Control Options

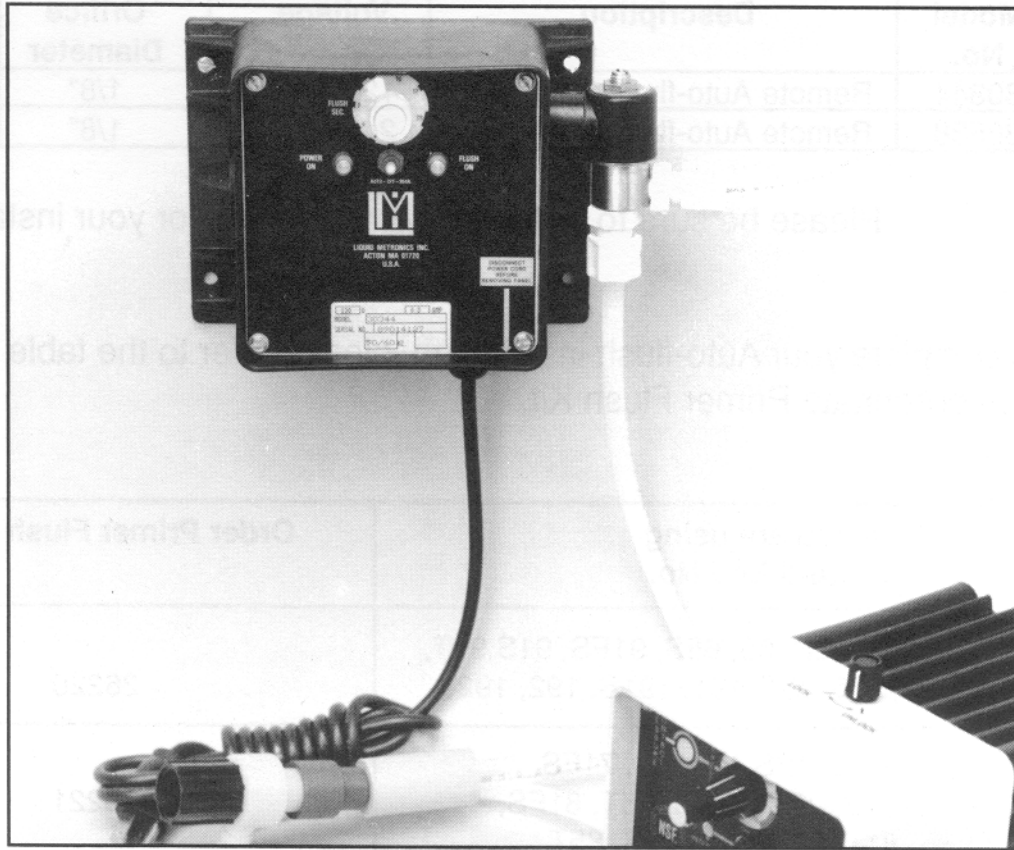

Permits manual flushing by an over-riding MANUAL toggle switch. On release, it returns to the off position.

Easy Output Control

Auto-flush adjustment regulates the time of the flush cycle, from 1 to 20 seconds, at one minute intervals.

Quick Visual Checks

POWER ON and FLUSH ON indicator lights provide quick indication of unit operations.

Ready to Install

The solenoid valve is prewired and mounted on the box, simply plug the unit into your electrical source and it's ready to go.

Simple Mounting

The Remote Auto-flush Controller features molded in mounting holes for easy wall mounting which allows easy user access.
